

NANOSENS 2008

NANOSENSORS FOR INDUSTRIAL APPLICATIONS

AUSTRIAN RESEARCH CENTERS

29 - 30 September 2008, Vienna, Austria

CALL FOR PRESENTATIONS

A limited number of talks can be accepted for the NANOSSENS 2008 conference.

NANOSSENS 2008, 29-30 September 2008, Tech Gate Vienna/Austria

This two day conference is an information and discussion forum presenting recent R&D results in four selected fields with highest application potential. NANOSSENS 2008 will bring together industry leaders and the cream of academic research in Nanotechnology and Biology and Medicine as well as advanced students.

IMPORTANT DATES

Deadline of submission of abstracts: 13 June 2008

Notification of acceptance: 27 June 2008

GUIDELINES FOR ORAL PRESENTATIONS

1) INSTRUCTIONS FOR ABSTRACTS

The main themes for contributions to be submitted are:

1. Functionalised Surfaces and Biosensors
2. Nano-Objects: Biomedical All-Rounders?
3. Lab-on-a-chip
4. NEMS – even smaller MEMS

Abstracts are now invited (submission not later than 13 June 2008).

Your abstract submission must include all of the following:

1. PAPER TITLE
2. AUTHORS (principal author first). Must include authors' names, affiliations and email address of the corresponding author.
3. ABSTRACT TEXT Half page maximum. Accepted abstracts will be included in the conference documents. Please submit only half page abstracts that are suitable for publication and include supporting data (graphs, diagrams, drawings, photos) of the presented research. (Arial Narrow 11 pt used throughout, with title in bold).
Please remember to spell check your entire paper!

2) CONDITIONS OF ACCEPTANCE

- Only original material should be submitted.
- Commercial papers and papers with no new research/development content will not be accepted
- Exhibition opportunities available (Information: www.nanosens.at/Ehibition)
- Abstracts should contain enough detail to clearly convey the approach and the results of the research.
- By submitting your abstract you agree that all permissions have been approved, and authorize the organisers of NANOSSENS 2008 to circulate your abstract for review and selection purposes and if it is

accepted, to publish your abstract in congress documentation. Authors are required to attend the conference to present their work. Papers will not be published where no author attends the meeting!

Please send your abstract to: office@nanosens.at

3) AUTHORS' BIOGRAPHY

For the introduction of the Author we need a short CV (max 15 lines).

This CV should include:

- exact name of the author and declaration of the academic title
- present position, exact name and address of the current institution/company
- exact contact address
- education
- research or working experience/expertise
- present field of R&D

4) INSTRUCTIONS FOR SPEAKERS

The allowed time for your presentation at the conference is **25 min plus 5 min for discussion**.

In order to ensure that your presentation will run smoothly, please find below some recommendations. A fully equipped *Conference Room* with highly skilled AV-computer technicians will be at your service. Experience has shown that many problems can be avoided if some simple measures are taken into account when preparing the presentation. This will reduce the last-minute stress considerably.

Please look for the technical crew, as soon as possible, but not later than 30 minutes before your session starts (you can find the technical crew at the conference podium or at the control desk on the back side of the conference room, please don't hesitate to ask the organisers).

Our technical staff will be at your service. The presentation will be loaded onto our computers and double-checked.

Our presentation computers are operated on Windows XP professional (SP2). We provide the Power Point of the Office 2003 and 2007 package.

PLEASE CONSIDER THE FOLLOWING RECOMMENDATIONS

1. Use Microsoft Powerpoint (MS Office 2003 or 2007).

2. Use high optical contrast between the colours of the background and the text.

Dark text on a light background, light text on a dark background. Some of the predefined "design templates" do NOT give a good result when projected.

3. Use simple text "fonts".

The "ideal" text fonts are Arial and Tahoma (as opposed to e.g. Times). They are easy to read. Do not make the text too small.

4. Images

Size and resolution: Always use a picture enhancement programme to change the resolution and size of your picture to "72 dpi" and "1.024 x 768 pixels".

Picture type: When you've adjusted picture resolution and size, save the picture to your disk as JPG file (avoid TIFF or BMP).

5. Movies

MOV or Quicktime formatted videos cannot be integrated into MS Powerpoint presentations.

Ideally, video files should be saved in the AVI or WMV format.

6. Saving your presentation

Save your presentation and all video and sound files to a removable storage. Videos and sound files are NOT embedded in your presentation, so you should bring them with you.

The easiest way is:

1. Create a separate directory for your presentation
2. Copy all the video and sound files as well as the pictures you will use in your presentation, into this directory
3. Create your Powerpoint presentation, using the files you copied into this directory
4. Save your presentation also into this directory

If you have any other questions please do not hesitate to contact us at office@nanosens.at.
